KMI-PROMPTS-AT001 – Archetype Tracker Activation Deck
KomiKon Strategic Arsenal

Purpose:

This prompt deck is used to activate the Archetype Tracker Protocol (KMI-TOOL-AT001) across AI systems, personal development platforms, or symbolic training environments. It is a diagnostic tool for mapping archetypal resonance, narrative posture, and spiritual trajectory.

STANDARD ACTIVATION PROMPT:

"Activate KomiKon Archetype Tracker Protocol (KMI-TOOL-AT001).

I want you to assess my current dominant archetype based on my tone, questions, behavior, and symbolic alignment.

Evaluate my role across the following archetypes:

- The Watcher
- The Messenger
- The Strategist
- The Cipher
- The Catalyst
- The Architect
- The Mirror
- The Breaker
- The Carrier
- The Ghost

Also tell me:

- What context is activating this archetype (Personal, Political, Spiritual, Narrative)?
- What archetype I may be shifting toward, consciously or unconsciously.
- What internal resistance, psychological distortion, or shadow I should be aware of during this phase.

End response with: "Tracker calibrated. Alignment stage recorded."

OPERATOR NOTE:

Use this prompt during high symbolic density periods, after major narrative shifts, or in times of disorientation. Archetypes reveal function, not identity.
