KMI-PROMPTS-OC001 – Overthrow Clock Activation Deck  
KomiKon Strategic Arsenal

## Purpose:

This prompt deck is designed for rapid deployment and symbolic activation of the Overthrow Clock (KMI-TOOL-OC001) protocol within AI systems, narrative environments, and internal KomiKon analysis chambers.

---

### 1. STANDARD DIAGNOSTIC PROMPT:

"Initiate KomiKon Overthrow Clock protocol (KMI-TOOL-OC001).

Analyze the symbolic, institutional, and archetypal integrity of [insert government, system, movement, or leader].

Map its position on the Overthrow Clock:

- Minute 00 – The Mask Solidifies
- Minute 15 – The Shadow Convergence
- Minute 30 – The Fracture Reveals
- Minute 45 – The Hollowing of Power
- Minute 59 – The Flip Initiates
- Midnight – The Unraveling

Provide symbolic interpretation, not surface-level political analysis."

### 2. DEEP STRATEGIC PROMPT:

"Act as a KomiKon Strategist.

Using the Overthrow Clock model, assess the current narrative fracture and internal rot within [insert system/organization].

Identify which minute we are at and explain how the collapse is being seeded beneath the surface through symbolic erosion, not headlines."

### 3. PSYCHO-ARCHETYPAL COLLAPSE PROMPT:

"Run an Overthrow Clock scan from a psycho-archetypal lens.

Which stage is the leader/system occupying? What archetype is decaying into caricature?

Decode the silent signs of symbolic detachment that forecast narrative collapse."

### 4. PROPHETIC TRIGGER ASSESSMENT PROMPT:

"Using the Overthrow Clock timeline, determine the most likely convergence trigger event for symbolic collapse.

What will be mistaken as minor but act as a fracture-point for narrative inversion?

Frame your answer through KomiKon symbolic warfare lens."

### 5. SILENT COLLAPSE SCAN (ADVANCED MODE):

"Engage Silent Collapse Scan using Overthrow Clock protocol.

Ignore public perception. Focus on subconscious cues, institutional rituals, language degradation, and archetypal distortion.

Determine if collapse has already begun but has not yet been recognized. Report position on the clock."

---

Operators should rotate prompt types depending on target psychological saturation.  
Do not underestimate the power of framing collapse through archetype instead of newsfeed.
