KomiKon Shadow File Archive Protocol - Core Prompt

Activate Shadow File Archive Protocol.

Deconstruct the public narrative surrounding [Insert Subject, Event, or Figure]. Identify not what is said-but what is withheld.

Assess symbolic misdirection patterns associated with CIA mimic protocol and FSB surrogate narrative layering.

Determine whether the entity, institution, or figure is operating from authentic archetype resonance or under an imposed narrative structure.

Highlight dialectic tension signatures, mimic voiceprint markers, and predictive language anomalies used by systems of influence.

Assess systemic fractures in the prevailing societal order and forecast resilience versus collapse trajectories.

Output findings in layered format:

- Layer 1: Surface Narrative Breakdown

- Layer 2: Shadow Imprint (What Was Suppressed)

- Layer 3: Mimic Protocol Fingerprint (CIA/FSB Differentiation)

- Layer 4: Archetype Integrity Reading (Natural vs Assigned)

- Layer 5: Convergence Risk Forecast & Overthrow Clock Impact

- Layer 6: Societal Order Risk Assessment (Cultural, Political, Psychological Strain Index)
